

SVMi-20E

Voice Messaging Solution

It All Starts With That First Call In.

You're out, and my call is urgent—so what happens next? You are busy or working from home—who helps me? The Samsung SVMi Voice Messaging Solution masters all your large and small message handling needs, automatic attendant, and the customized call processing options that say so much about your business.

You don't have to build a huge telecom system in order to sound like you have one—with full control of incoming calls. And Samsung's OfficeServ™ messaging solution supports small-to-medium business sizes from 5 to 500 lines, across the OfficeServ™ 7000 Series family. As your messaging system needs change, you build a scalable solution supporting from 4 to 12 ports (simultaneous calls), speaking in 9 available language options, and serving literally thousands of individual mailboxes.

Good service is always good for your business. And what does good service look like? To your customer, it starts with that single call—if it takes 2 attempts to find you, that's too many. From your perspective, Samsung's pioneering technology enhances your system efficiencies, with for example, "In-Skin" component designs, and a vast array of custom feature options that put real power at your fingertips. Add in the E-Mail Gateway, along with schedule tables, system modes, call recording, and Audiotex, and your business handles contacts better—routing, tracking, and processing them more effectively.

SVMi-20E Features

Access Manager

SVMi-20E Capacity and Compatibility Chart

Port Upgrade Type	VPM-E and/or VPMF-E		
	4	8	12
Ports	4	8	12
Compact Flash Size	128 MB		
Compact Flash MSG Storage	7 Hours†		
Hard Drive Size	2G Partition		
Hard Drive MSG Storage	140 Hours†		
Mailboxes	Virtually Unlimited‡		
E-Mail Gateway Users	5 - Unlimited‡		
Fax Ports w/ Optional VPMF-E	N/A	1	2
LAN	Yes		
Modem Daughter Card	Optional		
Serial I/O	Yes		
Fax Application Software	Yes		
Audiotex Application Software	Yes		
System Compatibility	OfficeServ 7000 Series		

†: Message storage times can vary based on the number of installed languages. The times in this table were calculated with the three languages (English, Spanish, and French) that are installed standard. Each language installed will consume 30 - 40 Minutes of Message Storage.

‡: The SVMi-20E software can literally have an unlimited number of mailboxes created. However a practical physical limitation based on size of data storage device, number of installed languages, number and length of personal greetings, number and length of custom prompts, and size of the overall application can be between approximately 1, 000 to 10,000 mailboxes.
